836160375

SPECIMEN TYPE

Venous Blood

REASON FOR REFERRAL

?Klinefelter's syndrome

CYTOGENETIC DIAGNOSIS

47,XXY

COMMENTS

This study is diagnostic of Klinefelter's syndrome.

The patient should receive genetic counselling regarding the implications of this finding. I do not know which genetic centre is closest to your patient. However, if you prefer to put him in touch with us (905-433-2733), we will be pleased to see him.

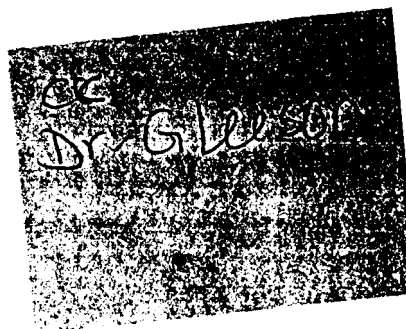

NO. CELLS & RESOLUTION

15 G-banded cells were examined.

The band resolution of the analyzed cells was in the range of 400 - 425 bands per haploid set.

REFERRED-IN INFORMATION

HICL specimen number: 101107007x  
Institution: MDS Laboratories  
L701: 1  
L702: 1  
L803: 1
